

A close-up photograph of several stainless steel fittings, specifically 90-degree elbows, arranged on a dark, textured background. The fittings have a hexagonal base and a threaded end. One fitting in the center has the number '316' stamped on it. The lighting highlights the metallic texture and the precision of the manufacturing.

RACCORDI CALZAMENTO INOX

STAINLESS STEEL TOUCH FITTINGS

Touch fittings are mainly used during “plastic” tubes assembly especially in case of vibrations or extreme climatic conditions (that involve changes on tube features by passing time). The fitting tube connection takes place through the clamping of a metal ring which makes it safe and reliable during time.

Standard supply	Ø Tube from 6/4 to 12/10 mm Thread from 1/8 to 1/2"	
Material	Stainless steel body and nut Viton Seal Stainless steel seeger

I raccordi a calzamento sono particolarmente adatti negli assemblaggi di tubi "plastici", in particolar modo dove possano esserci vibrazioni o condizioni climatiche estreme (che comportano nel tempo mutamenti alle caratteristiche del tubo). L'aggancio del tubo al raccordo avviene infatti attraverso il serraggio di una ghiera che lo rende sicuro e affidabile nel tempo.
